In the best package—Clean, bright aluminum

## Science in Service of Mankind

When the real story of human progress is told, probably the salient contribution credited to the present generation will be the alliance of science with pursuits of peace and the mobilization of scientific minds for the common good.

This generation, more than any previous generation in human history perhaps, has effected a divorce of science from war. In the past, the best scientific minds were directed to the chemistry and physics of warfare, industry and commerce for the most part having to content themselves with the second-best or rely upon adaptation of some invention or process originally devoted to war.

That is a broad generalization which, in the specific case may not be true, but which, in the main, can be substantiated; and the fact remains that war has been the great stimulus to scientific research and invention, and until the present generation, a greater stimulus than industry, commerce and the pursuits of peace. It might also be said that science in its first alliance with industry and commerce had a background of war—of economic war. Now, however, the science laboratory is a workshop, in the true sense of the word.

Illustrative of this idea is the little country of Denmark, where agriculture has reached a scientific plane higher than in any other country. The great stimulus to scientific agriculture in Denmark was war. Following the war with Germany, in which Denmark lost the provinces of Schleswig and Holstein, the Danes turned their attention to the intensive cultivation of their very limited resources recognizing that, only by high commercial development of these resources, could they hope to survive as a people, and Denmark as a nation. That they have succeeded is proved by the fact that agricultural cost in Denmark is lower than in any other country, and in certain advanced phases of agriculture.

The aeroplane, too, now occupying a supremely important role in the development of Canada's remoter areas and great mineral-bearing zones, and serving to "devour distances" which hitherto occupied weeks, sometimes months, of arduous and hazardous travel, made its greatest advancement during the hectic days of the World War. There was less material difference between the original Wright aeroplane, or the plane in which Blériot first crossed the English Channel, and the planes used in the early days of the war, than between the planes of 1914 and those which patrolled the front areas in the days immediately preceding the Armistice. That process of development which gathered so much impetus throughout the war, has been carried into this post-war period, a fact which is abundantly manifest.

The World War saw a general mobilization of science not only in Germany where, for some years previously, industrial research had been encouraged in that country's efforts to wage successful economic war against its rival neighbors, but also in and throughout the British Empire and the United States. There was no demobilization of the forces of science after the war in these countries. There was imperative need of retaining the best scientific minds available in the work of reconstruction and of meeting competition in world trade. Science thus has come into its own.

Canada came late into the movement, but having entered, is now displaying the energy and enthusiasm characteristic of its youth and growing power. With agriculture as the basic industry of the country, it is natural that the mobilization of science in Canada should be directed in large measure to the advancement of that industry. Within this movement, the chemist has turned his attention to the milling qualities of wheat. The biologist is studying the theory of breeding crops of the different kinds of wheat, the causes and remedies of plant diseases, the insect pests and their control. The physicist has begun to investigate soil temperatures and the engineer to consider power problems, water supply and waste in farm houses. The economists have concentrated on marketing problems, and so on.

Noteworthy already have been the achievements of the scientists at work in the Dominion Rust Research Laboratory, at Winnipeg. The progress already made toward the production of a rust-resistant wheat that will meet requirements as to milling and yield, have been so impressive as to presage an epoch-marking development in the near future.

### Always Come Through

Call it luck, or national stamina, whatever you will, there is something about the British that carries them through. They are paying more taxes than the average German, Frenchman and Italian put together; they have commitments all over the world, and they have a surplus population, with tremendous problems of employment and trade. Yet they never quail.

### B.C. Onion Growers

The Vernon Fruit Union, which has closed its onion pool, is paying to growers \$46.61 net, including local rebates, for every ton of onions delivered to them on consignment during 1928. This price is recognized as particularly good. Hitherto \$34 to \$35 a ton has been deemed high.

### Canadian Graphite

Canadian graphite is marketed as refined flake, the product of concentrating the flake of disintegrated ore. The mines and mills are situated in the Perth, Bancroft and Cabotage districts in Ontario, and in the Buckingham, Guenette, and St. Remi districts in Quebec.

### Minard's Liniment for cuts and bruises.

Canada's Largest Organ Installation of the Royal York Hotel Casavant organ, the largest in the Dominion, has begun after months of preparation made for it. It was made in the world-famous workshops at St. Hyacinthe, Quebec, and its parts conveyed to Toronto in five railway cars.

## Guard Against FLU Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless these germs are killed by some antiseptic treatment a serious illness is the result.

A simple treatment is to gargle the throat three times daily with *Nerviline*. The antiseptic properties of *Nerviline* quickly destroy the germs in the throat. Of course if the chest is sore *Nerviline* should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "flu" or colds from gaining headway *Nerviline* will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of *Nerviline* and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

## A Big Business

Postal Department in Canada Handles Millions Every Year

Rural routes have been extended and the inauguration of the air mail service has made it possible to deliver mail in the winter time to many isolated spots which have never before received mail during that season; thus bringing comfort to the people of the Magdalen Islands, the north shore of the St. Lawrence River, northern sections throughout the Mackenzie River district, Cold Lake, Flin Flon and north to the Yukon. The postal department has some 35,750 employees in the Dominion of Canada. Of these, between 12,000 and 13,000 are postmasters. The department handles resources of revenue somewhere in the neighborhood of \$50,000,000, approximately \$50 for every person in Canada in one year.

## DO YOU VALUE HEALTH?

### Sickness Almost Always Due To Weak, Watery Blood

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches or backache; if there are touches of indigestion, or twinges of rheumatism, you may depend upon it that these symptoms come from an impoverished condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says: "My first experience with Dr. Williams' Pink Pills was as an anemic young girl, when they completely restored my health. Then a few years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a fair healthy baby. I did not have a day's sickness. My friends all tell me how well I look and I certainly feel that way. I give the pills credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the pills from your druggist, or by mail at 50 cents a box from The Williams' Medicine Co., Brockville, Ont.

## Farmers Will Grow Peas

### Ambitious Planting Programme in the Taber Irrigation District

The other day a carload of dried peas, being 18 tons, arrived from Gallatin Valley, Montana, for planting by Taber, Alta., irrigation farmers in the interests of the Broder Canning Company, whose headquarters are in Edmonton and Vancouver. While pea gardens have been common in the district for many years the present planting programme is much more ambitious than anything in the past.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the form create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

### False Economy

There are many people who would die of starvation rather than dig into their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the usual pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

### Women Archaeologists

This archaeological season in Palestine shows a new feature of social interest. For the first time archaeological excavations are being carried on by a staff of women. This plan has been initiated by the British School of Archaeology, Jerusalem, which sent a party consisting of Miss Garrod, Miss Eubank, of Cambridge; Miss Kitson Clark, of Oxford, and one American woman to continue the work near Athlith, South Haifa. The direction is in charge of Miss Garrod.

Work joined with courage enables us to overcome all obstacles.

Neuralgia succumbs to Minard's Liniment.

W. N. U. 1706

## Canadian Press Excursion

### Newspaper Editors To Enjoy Extended Holiday in Europe

Newspaper editors from all over Canada who leave Montreal early next month for a two month visit to England and the continent, when they return the visit paid to Canadian newspapers two years ago by the Newspaper Society of Great Britain, will be entertained royally wherever they go. Pull plans for the visit, which is being organized by Rupert Davies, editor of the Kingston Whig-Standard, were announced recently, following his return from the meeting of the Canadian Daily Newspaper Association at which many of those who are going to Europe meet.

Among the high spots of the visit, which, although entirely unofficial, will be of great benefit to Canada and to the prospects of increasing trade between the two countries, is a dinner to be given and presided jointly by the Newspaper Society of Great Britain and the Empire Press Union in London, a gala performance at the State Opera House in Vienna and a garden party at which the president of Czechoslovakia will be the host.

There is to be much private entertainment with such hosts as Lord and Lady Astor, Lord Beaverbrook, Major John J. Astor, of The London Times, Col. Grant Morden, and Sir Richard Whistler, who was one of the leaders of the British party which spent some months in Canada in 1927, and who will receive the Canadian editors at his home in Peterborough.

The complete itinerary commences with the sailing of the Canadian Pacific liner "Montclare," on Friday, June 6, and includes visits to France, Austria, Czechoslovakia, Germany, Belgium, Holland, Great Britain and Scotland. Five weeks will be spent on the other side of which three will be spent in Great Britain. The editors will return to Canada from Liverpool on the liner "Duchess of Atholl," reaching Montreal, July 26.

## Origin of National Anthem

### Is One Musical Mystery Nobody Has Solved Yet

The origin of the British National Anthem is a musical mystery which has never been solved. It is known that it was first sung in public at Drury Lane and Covent Garden in 1745, when the news of the defeat of Sir John Cope's army at Prestonparr reached London. But it was some few years earlier than this. One thing students of the subject are fairly sure about is that it was written as a national prayer for the safety of George II. against the Jacobites, and the version given in "The King's Magazine" in 1745, makes it peculiarly applicable to the fervent prayer of today, though for a very different reason.

Simple and Sure—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young and old.

## Not An Affection

### True Courtesy Is Outward Expression Of Sympathetic Nature

Many people regard the graciously mannered man as distasteful, and look with disfavor on displays of extreme politeness—and there certainly is a type of manner which repels because of its paternal artificiality. But true courtesy is not an affection; it is the outward expression of a thoughtful and sympathetic nature. We cannot all achieve outstanding success in life; we cannot all perform great services for our fellow-men; but it is possible for the least of us to act graciously in our dealings with others—to behave beautifully in the ordinary affairs of every day. Let us then cultivate that "finest of the fine arts"—courtesy.

Cheapest Of All Oils.—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Melting of the Antarctic ice cap, according to an Australian scientist, would raise the levels of the oceans by fifty feet.

No matter how deep-rooted the corn may be, it must yield to Halloway's Corn Remover if used as directed.

An Imperial Airways liner covered the distance from London to Paris in 100 minutes.

Minard's Liniment relieves pain.

## The Wonders Of Chemistry

### Will Be Used To Build and Change Character Is Prediction

The American Chemical Society, meeting at Columbus, Ohio, held out a few alluring prospects for the future.

For instance, the time may be coming when a man won't have to build his own character, but can depend on chemistry to do it for him. Then persons owing cows, if they're fortunate enough to have a little woodland, will have the cow-d problem solved for all time because cows will eat wood.

Wood, chemically treated, is already being used for cow-fodder in some countries, according to C. L. Eselen, Boston chemical engineer, who addressed the society.

Dr. J. S. Matthews, of the University of Wisconsin, predicted that chemistry would be used to change and build character and in this connection he believes the insane will be made well and that the seasoned criminal will become a law-abiding citizen.

Future generations may be giants, one chemist said, if scientists can discover, by synthesis, the cause of growth which lies hidden in the cell nuclei. The discovery, he said, he believed, would hinge upon the balance of atoms.

## Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

How many people do you know who are spending money they don't need yet earned for things they don't need to impress people they don't like.

The prairie provinces with manufactured products during last year valued at \$327,000,000 begin to have tall chimneys of their own.

## Another X-Ray Victim

### French Doctor No Longer Able To Use Hands

Another specialist has been added to the list of X-ray victims. Dr. Sebastien Turchini, of the Charite Hospital, Paris, has had to resign on account of injuries received. Since 1919 he has undergone a number of operations, and has lost several fingers, so that he is no longer able to use his hands for manipulating the X-ray apparatus. For 30 years Dr. Turchini has been associated with the development of the X-ray treatment, and, although suffering ill-effects, has shown great devotion.

## Could Hardly Live For Asthma

Writes one man who after years of suffering, has found comfort with Remedy. Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

## May Make Polar Trip

### Graf Zeppelin Likely To Make Expedition Next Year

In addition to being groomed for a round-the-world trip this summer, the Graf Zeppelin is destined to show its silver sides to the white waste lands of the Arctic before another year has passed.

The International for the Exploration of the Arctic Regions by means of aircraft, has entered into a contract for the use of the big ship for an expedition from Leningrad to either Nome or Fairbanks by way of North Pole regions. The trip will take place in April or May of 1930.

A new laboratory in Berlin, Germany, is equipped to produce temperatures as low as 452 degrees below zero, or about 8 points from absolute zero.

**HELP WANTED**

**HUNTER-MARTIN & CO., REGINA, SASK.**

## NEW TAX ON SALE OF SHARES TO BE LEVIED

Ottawa.—The new tax on sale of shares of stocks scheduled to come into effect on July 1st, again received the endorsement of the House of Commons. By a vote of 96 to 58 the House defeated the amendment moved by Hon. R. E. Bennett, Conservative leader. The amendment would have had the effect of leaving the tax on shares as it is at present. The amendment was moved when the resolution to give effect to the tax changes came up for second reading. This resolution had a rough time when the House was in committee of ways and means but emerged successfully after two votes. The new taxes were attacked along much the same lines. A conspicuous opponent was Malcolm Lang, Liberal member for Temiskaming South who condemned the proposal in no uncertain language and voted against it when the House divided.

A number of Conservative members voiced their opposition to the new levy but the other groups took little part in the debate.

Following the division, the resolutions received second reading and a bill based on them received its first reading.

During the debate the minister of finance, Hon. J. A. Robb, said there was never a time in recent years when so much speculation had taken place on the exchange throughout the country than had been witnessed during the past year. He submitted there was a general feeling that the nation should profit by this speculation, if men decided to gamble on the market and risk their money, there was no reason why they should not assist the national treasury, Mr. Robb said.

## Engine Driver Acquitted

Verne Alexander Found Not Guilty of Criminal Negligence

Parry Sound.—Verne Alexander is a free man, acquitted by a jury of his peers on charges of manslaughter and criminal negligence. Alexander was the engine driver of the ill-fated Canadian National train No. 3, which crashed head-on into another train after running past its ordered meeting point at Droucourt in the early morning hours of March 20 last. Seventeen and possibly 20 lives were lost, and criminal proceedings were launched against the three surviving members of the train crew.

After a trial lasting two days and a half, Alexander was found not guilty by a jury under Mr. Justice Raney. The charges against Fireman Edward Riley, of Winnipeg, and brakeman Charles Gorries, of Toronto, will not be proceeded with.

The chief defence offered was the distraction under which Alexander was laboring—the operation of a "fame" engine—coupled with the failure of the warning signal which is ordinarily given by the conductor as a train approaches a meeting place. Alexander admitted he forgot his orders and flashed past Droucourt.

## Honorary Degrees

Five Degrees To Be Conferred by University of Manitoba

Winnipeg.—Five degrees of doctor of laws, honoris causa, will be conferred by the University to the list prepared by university officials.

Those who will receive the honorary degree are: Henry Mark Ami, director of Canadian school of pre-history in France; David M. Duncan, superintendent of schools, Winnipeg; Rev. R. G. MacBeth, pastor of St. Paul's Presbyterian Church, Vancouver; Chester Martin, professor of history, University of Manitoba; Walter C. Murray, president, University of Saskatchewan.

## Appointed To Calgary Post

Ottawa.—Lieut.-Col. C. E. Connolly, officer commanding Lord Strathcona's Horse, Royal Canadian, is to take over the duties of general staff officer, Military District No. 13, Calgary. It was announced at the department of national defence. He will succeed Captain H. T. Cook, of the R.C.R., who returns to regimental duty at St. John's.

## Cruiser At Victoria

Victoria.—H.M.S. Colombo has arrived at Esquimalt naval base here from Bermuda in command of Captain C. C. Dodson, D.S.O. The cruiser will remain in British Columbia waters until August.

W. N. U. 1786

## Urges Outlets For Peace River Country

Railway Would Lengthen MacKenzie River Season Says General McRae

Ottawa, Ont.—Construction of railway outlets for the Peace River country from the MacKenzie River to Vancouver, through Peace Pass, which is claimed would increase the present season on the MacKenzie to the Arctic from two and one-half, to four and one-half months, was advocated in the House by General A. D. McRae, Conservative, Vancouver North.

The railway, as advocated by General McRae, would be joined in its course by the present railway from Peace River Crossing and Edmonton and would meet the MacKenzie River somewhere below Great Slave Lake in the vicinity of Fort Providence. It would give, General McRae estimated, a 40-hour rail service from Edmonton to that point. This would compare with the present "infrequent boat journey of eight days downstream and 12 days return, and that for a limited time each year."

"The railway, by missing all boat delays due to ice in Great Slave Lake in the spring, would make it possible," he declared, "to reach the MacKenzie River six weeks earlier in the spring and two weeks later in the fall, increasing the present season on the MacKenzie to the Arctic from two-and-one-half to four-and-one-half months, thus opening up a new Arctic for us."

With such a railway line the MacKenzie River season would be from May 15 to early in October, General McRae stated.

## Would Cost Forty Million

Charter Being Asked For Manitoba Line To Hudson Bay

Winnipeg.—Approximate cost of the proposed Emerson-Churchill Colonization Railway, which would act as a feeder to other railways and bring Winnipeg 260 miles nearer Churchill, terminus of the Hudson Bay Railway, is \$40,000,000, Charles F. Gray and Fred C. Hamilton, directors of the company seeking a charter for its construction from the Manitoba government, told members of the law amendments committee at a special session held here.

The committee ordered the bill reported to the legislature with an amendment providing that construction be commenced within three years and completion of the line in seven years.

The line would be constructed from Emerson, 60 miles from Winnipeg on the Manitoba-Minnesota boundary.

## Ask Higher Duty On Eggs

Poultrymen Have Made Application To Tariff Advisory Board

Ottawa.—For the first time on the records of the tariff advisory board, the western provinces have produced an application for an increase in duty.

There are 40,000 poultry men of the western provinces and many more from Ontario, as well as more than 2,000 merchants from British Columbia and the prairie provinces, who sympathize with the application placed before the tariff advisory board recently for 200 per cent. increase of duty on imported eggs.

The increase asked in the applications is from 3 cents to 9 cents on every dozen of eggs brought into Canada in the "extras" class. The item probably affects more individual producers than any other which has ever come to the attention of the commissioners.

## Phillips To Retain Post

Ottawa.—Hon. William Phillips, first United States minister to Canada, will continue here during the Hoover administration. Mr. Phillips returned from Washington where he conferred with President Hoover, and Henry L. Stimson, Secretary of State. There was no indication, he said, that there would be any change of representation in Canada.

## Postal Bill

Ottawa.—The House of Commons gave second reading to the bill which provides for adjustment of salaries of the postal employees who participated in the Winnipeg strike of 1919 and were subsequently re-employed at reduced wages. The bill now stands for third reading.

## Celebrated Liberation

Sofia, Bulgaria.—Tens of thousands of Bulgarians from the most remote towns and villages of this little kingdom were on a pilgrimage here May 15, to participate in the fifteenth anniversary of Bulgaria's liberation from secular Turkish rule.

## EXPLOSION IN HOSPITAL TAKES A HEAVY TOLL

Cleveland.—Poison gas and two explosions which followed burning of X-ray films in the Cleveland Clinic claimed 124 lives.

There were 98 known dead, and hospital authorities worked desperately to administer artificial respiration to 43 more who were overcome. Victims from the disaster were dying at short intervals, and physicians sent out appeals for additional oxygen for fear that the supply in the city might prove insufficient.

Nearly all the deaths were attributed to the deadly gas which filtered through the four-story brick building—slowly at first, and then augmented by a second and greater explosion than the first, rushed up from the basement and cut off escape down the stairways and elevators.

It was ironic that the disaster occurred in a very place where the most advanced instruments and laboratories of science had been turned against pain and death. The clinic was owned principally by Dr. Geo. W. Crile, nationally-known physician, who was too occupied with relief work to comment on the catastrophe.

Identity of the powerful gas which wrought one of the worst tragedies in the history of the city had not been determined.

It is probable, however, it was a mixture of gases coming from many forms of chemicals in the building. In addition, the burning films gave off a gas said to be bromine.

Although doctors and nurses got out a few patients at the start hardly a minute went by before the fumes filtered out from every opening, forcing rescuers back. When the gas began to lift, they rushed into a scene of shrieking horror.

Bodies littered the floor like flies that had been sprayed with poison. Some of them were scorched by flames, their clothing still smouldering. Others who had not lost consciousness were crying out in agony. Among the most pitiful sights of the disaster were suffering patients who in agony dragged themselves to windows seeking fresh air, and who were too weak to break the glass to get it. They clawed their hair and shrieked, but their voices were drowned out by other noises. For a moment they stood at the windows beating helplessly, then slid down to the floor out of sight to die in horrible fear.

The Cleveland Clinic is a separate building from the Cleveland Hospital. The Clinic, a four-story building, houses many laboratories of physicians, and the death toll was from both the staff and patients who come for consultations.

## Coal Rates From Alberta

Edmonton.—Coal from Alberta mines will move to Ontario at the special freight rate for the same period in 1920 as this year. A. Chard, freight traffic supervisor for the province, has received notice from the Canadian Railway Board, of an order setting January 15 to July 15 as the coal movement season for next year, thus continuing the present arrangement for one year more.

## PRESIDES AT NEWSPAPER GATHERING

Henri Gagnon, president of the Canadian Daily Newspapers' Association, who presided at the tenth annual meeting of that organization.

## All-Canada Telephone Line

Plan Would Link Up East and West On All-Canada System

Edmonton.—Planning an all-Canadian telephone line between east and west, which might be in operation this summer, prominent telephone company officials arrived in the city for a conference with the provincial government. In the party are H. L. Harris, executive vice-president of the Associated Telephone and Telegraph Co., Chicago; W. N. Curtis, vice-president and general sales manager of the Automatic Electric Co., Inc., Chicago, who are accompanied by G. H. Halse, chairman of the British Columbia Telephone Board.

At present Alberta and British Columbia are the only two provinces which have inter-provincial telephone service. Now it is planned to link up all the provinces so calls can be handled on an all Canadian line without having to utilize services in the United States.

After leaving here the officials will confer with the governments in Saskatchewan and Manitoba. Mr. Halse will go on to Ottawa, while the others will return to Chicago.

## Pay Fines On Instalments

Bill Before Senate Would Amend Criminal Code

Ottawa.—A bill sponsored by Senator Reuben amending the criminal code so as to provide that fines may be paid on the instalment plan, was given third reading in the Senate.

The Senator pointed out that there were 220,000 people convicted and fined last year in Canada. Of these 45,000 paid and the remainder went to jail. He thought it unfair to brand as jail birds many who were unable to pay their fines.

## Death Of Pioneer

Winnipeg, Man.—William Elliott Macara, K.C., 70, registrar-general of Manitoba, and pioneer of the province, died at his home here, May 15. He had been ill for several months. Mr. Macara was born in London, Ontario, and he came west in 1882. He had been connected with the land titles office here for more than 42 years. Mrs. Macara survives.

## Deer Permit Petting

This photograph is submitted by W. E. Round, of Banff, Alberta, as evidence of what protection does in the way of overcoming timidity. These deer, native to Banff National Park, will use either back door or front when visiting and now have so much misguided confidence in humanity that they allow themselves to be petted.

## Feed Grain For Poultry

Alberta Wheat Pool To Assist Poultry Raisers Of B.C.

Vancouver.—With the object of supplying British Columbia poultry farmers with feed grain at prices lower than those now charged, the Alberta Wheat Pool is turning its attention to this phase of marketing and is expected to institute a service which will benefit the poultry industry, particularly in the Fraser River Valley.

This makes the gist of an announcement made by G. G. McGeer, K.C., before the Saskatchewan Royal Grain Enquiry Commission. The sitting was devoted to the hearing of witnesses from among British Columbia poultry raisers. Mr. McGeer intimated that he would call witnesses to bear out his announcement regarding the plans of the Wheat Pool.

Two farmers who had retired from the prairies to raise poultry in the Fraser Valley, painted a gloomy picture of present conditions in the industry. They agreed that without cheaper feed British Columbia farmers faced ruin.

## Will Tour Western Canada

New Head Of Salvation Army To Make Visit Next Fall

Toronto.—General Edward J. Higgins, recently chosen head of the Salvation Army, in succession to General Bramwell Booth, will tour western Canada in the course of his first visit to the Dominion next fall.

Accompanied by his wife, he will arrive at Montreal on August 20, and after visiting a number of eastern centres, will proceed west. His western itinerary, however, has not yet been planned.

General Higgins will attend the National Congress of the Salvation Army in Canada, to be held from October 11 to 16, inclusive.

## KING GEORGE RETURNS TO WINDSOR CASTLE

Windsor, Eng.—The King came back to his own friends in this ancient home of British sovereigns like a conquering hero.

King Windsor and the surrounding countryside were out to welcome their monarch back after his long illness, which for many weary months had kept him from them. Windsor was decorated as seldom before. Not a single house or shop of the city or in the main street of the Hill without gay decorations.

The King, accompanied by Queen Mary, had a remarkable reception throughout their 2½ hours' trip from Craiglawn House, near Bognor, where the King had spent several months of convalescence. He remained for the "old home town" to outdo all the others as it welcomed again its most prominent resident.

Thousands of cheering spectators, including two thousand school children and one thousand Eton boys in silk hats and quiff jackets lined the ancient thoroughfare. As the royal car drove through, bags of rose petals were emptied from windows and fell in a crimson cascade about the machine.

It was the first time most of the inhabitants of Windsor had seen the King since the beginning of his illness late last year. All along the line there arose cries of "God bless your majesties!" and "Welcome home!"

The King and Queen were smiling happily as they bowed towards the white sea of fluttering handkerchiefs, and once or twice the Queen brushed moisture from her eyes.

At the bottom of Castle Hill, where stately up towards the ancient grey stone pile, were waiting the mayor in his golden chains of office with his aldermen. The royal car halted and the door near which the King was sitting swung open. His smiling face appeared, and he grasped the hand of the mayor as he said:

"Thanks very much. We are pleased to be back in Windsor and I am very glad to see so many citizens here."

The King shook hands with the rest of the delegation and the car then swung up the hill towards home.

It was officially stated at the castle that the King bore the journey well and that His Majesty showed no signs of undue fatigue. Soon after arriving at the castle the King and Queen lunched together.

Announcement has been made recently that Queen Mary would hold courts at Buckingham Palace on June 28 and 27.

## TO URGE RIGHT OF WOMEN TO SIT IN SENATE

Ottawa.—Proposed amendment of the British North America Act to enable women to sit in the Senate, and the subject of women's having equal rights with men in the selection of political candidates, were among the outstanding questions under consideration here by members of the legislative committees of the National Federation of Liberal Women of Canada.

In welcoming the delegation, drawn from all parts of the Dominion, Mrs. Mary Ellen Smith, of Vancouver, B.C., president of the Federation, presented a note of optimism.

"The citizenship we enjoy demands our best," she said. "It requires our utmost endeavor; it deserves our serious thought in that our principles are near and dear to us, and we are assembled to decide what the best methods of promoting good-will are, also to cement the ties that bind us."

Mrs. Smith urged that the work of the federation be co-ordinated and constant care exercised "to help in the best manner possible to prove that we are big enough—whether east or west—to see the other woman's viewpoint." Members should be tolerant enough to compromise and always to feel that their motto should be "charity towards all."

## Parliament Will Sit On Wednesday Evenings

To Put Through Balance Of Session's Business Without Delay

Ottawa.—Promotion of parliament begins to loom on the horizon. With a view to expediting the remainder of the work of the session, Premier W. L. Mackenzie King has given formal notice on the order paper of the House of a motion for the Commons to sit on every Wednesday evening, beginning at once.

The usual practice is for a six o'clock adjournment each Wednesday evening, but towards the end of each session Wednesday night sittings are introduced for the purpose of putting through the balance of the session's business with as little delay as possible.

## New Branches For Red Cross

Society Added Fifty-Three To Organization Last Year

Ottawa.—A definite advance in the ramifying activities of the Canadian Red Cross Society during 1928 was reported by Dr. J. L. Biggar, national commissioner, of Toronto, at a session of the central council of the society.

At the end of the year under review 433 local branches are functioning. This total included 52 new branches and reorganization of 52 inactive ones.

The commissioner's report indicated that, although ten years had elapsed since the end of the world war, there had been no material diminution of Red Cross service for ex-soldiers.

## Amend Metal Marking Act

House Of Commons Passes Bill In New Form

Ottawa.—In amended form, the bill amending the precious metals marking act, 1928, was passed in the banking and commerce committee of the House of Commons. The measure, as it now reads, provides that if an article imported under this act has applied to it any mark, it must, if manufactured in Canada, bear also the name of the manufacturer. If an article is imported and has applied to it any mark, it must also bear the trade mark of the importer, or the name or trade mark of the manufacturer or dealer together with the word "imported."

## Purchase Timber Rights

Oshawa Firm Will Supply General Motors With Timber Needs

Oshawa, Ontario.—Gale and Trick, of this city, announced that their firm has purchased a block of 75,000 acres of timber rights in northern British Columbia, and has a mill under construction to cost approximately \$150,000.

The limits are about 90 per cent. of the city, announced that their firm has purchased a block of 75,000 acres of timber rights in northern British Columbia, and has a mill under construction to cost approximately \$150,000.

**PROGRESSIVE**, representative motorists are being attracted by the thousand to the Pontiac Big Six.

Because it has a Big, six-cylinder engine, with GMR high-compression cylinder head. Because its line-of-drive is accurately balanced. Because it has big, beautiful Bodies by Fisher. Because it has the comfort of Lovejoy Shock Absorbers. spring covers the security of big, noiseless internal-expanding four-wheel brakes and an array of big-car features never before combined at anywhere near its price.

You should see Pontiac Big Six before you decide on any car.

#### NOTES AND COMMENTS

The fine weather after a very prolonged period of wintry blasts is doubly welcome, and Coleman people are taking full advantage of it. The tennis courts attract the younger and more agile folks, those who have cars enjoy the splendid motoring which the trails through the foothills and the mountains afford, while the open-air club at the corner provides a common meeting ground where all the affairs of the day may be discussed, from the general elections in Great Britain to the latest gossip around town. Which makes one realize what a safety valve is the right of free speech.

There is one thing in free speech that people should guard against, and that is the purveying of scandal which all too many appear to take great delight in. Not infrequently some of the most absurd stories are circulated concerning persons, which investigation proves to be absolutely false, and which, were the sources of the scandal traced, would probably render the originators to action for libel or slander. The truth may come out, but often it does not have a chance to overtake the lies that may have been circulated by thoughtless persons who have no regard for the reputation of those of whom they gossip.

A gentleman representing the British and Foreign Bible Society was here this week, and he gave the Journal some interesting incidents concerning his work in collecting for this worthy organization. And the substance of it all was that those communities or churches which give generous support to the organization's appeal are usually possessed of vision far beyond the immediate circle in which they operate, and follow as closely as they can the teachings of the Great Master who said, "Go ye into all the world and teach all peoples." The great hindrance to many people's happiness is not lack of money, though it must be admitted it purchases the comforts and conveniences of life which every normal being desires; but their lack of enthusiasm for anything in life. They travel in a rut, which though not as deep as a grave, is of about the same use in accomplishing anything, with the consequence that life has no joy for them.

Become enthusiastic or interested in something in your community; there are many opportunities for every individual, especially business men who have a little more choice in the use they may make of their time than the salaried worker. If there is one annoying type of individual, it is he who while doing business in a town, is continually growing at something or other, giving no encouraging support to others who have a little vision and are not afraid to expend some of their time and energy in trying to keep out of the rut. Sometimes it is necessary to call a spade a spade to shake people out of their lethargy, even though displeasure might be incurred.

Local golf players talk of calling a meeting for re-organization. With half of the Coleman players paying dues to Blairmore club, it makes it difficult for those who remain loyal to the home club to foot the bill of maintaining a local course. When it comes to a choice of towns as to which deserves the support, in matters of this nature, well, there should not be any question which is the right thing to do.

#### A Message, From Coleman Board of Trade

To make a community a worth-while place to live, business men, and that means every one who prides himself on being known by the term, must give some of his time and energy in its behalf. To merely say "I will put up my shack" is not sufficient. To give a little money does not accomplish the object in view. Active interest and participation in all activities to try and lift the town above

## In Africa---

Beer, known under many different names according to the country in which it was used in ancient days, was also known and used in Africa. For how long it had been known to the natives is uncertain, but an eminent authority, Dr. G. T. Mann, tells us that the Kaffir races of South Africa have made for ages, and still make, a drink from the seed of the millet, which is first subjected to a mashing process identical with our own. Right from the ancient Greeks up to the present time, Beer is the accepted beverage.

Today Most Beverages  
**BEER — ALE — STOUT**  
are considered Health Drinks.

Where BEER has once been introduced, it has generally become the national beverage.

## Enthusiastic Luncheon Meeting of B. of T.

**Fine Response to Re-Organize and President Gratified With Turn-out—Presentation to Retiring Secretary, "Wally" Purvis**

Forty business men and members of the Board of Trade attended the luncheon in the Grand Union hotel on Wednesday, presided over by Alex. M. Morrison, and the meeting companies and almost every business house in town was represented, as well as the clergy.

An interesting feature of the gathering was the presentation to Walter S. Purvis of a fountain pen set by the president on behalf of the Board, who stated that Mr. Purvis has not only faithfully worked as secretary of the Board, but had put hockey on the map in the Pass, and in every way had worked for the welfare of the community. His work was all the more appreciated when it was considered that he did it from entirely a spirit of goodwill, and in his departure he would undoubtedly carry with him the hearty good wishes of Coleman citizens.

Mr. Purvis stated that ten years ago he left Toronto, following his war service overseas, and his thoughts travelled back to the friends he left there, fellows who would lend another their last dollar or pull him out of any kind of a mudhole. He didn't think at the time he would wish for better friends, but since living in Coleman he had come to know many good friends among the business men, perhaps of more mature age than those he left back east, but whom he had found ready to give him advice and whose friendship he appreciated. The presentation came as a surprise to him, and he could not say more than to thank everyone most heartily for their good wishes.

A motion by Roland Laslett and J. A. McDonald was passed, that the board meet on the first Wednesday of each month at the Grand Union Hotel at 1 o'clock, and W. L. Rippon moved that the annual meeting be held on Wed., June 6, this receiving a unanimous vote.

H. C. McBurney brought to the notice of the meeting the dates of the carnival in aid of the skating rink, asking every business man to give it his support to relieve the deficit on the rink.

An old-timer, F. G. Graham, whom the chairman said had organized three Boards of Trade in Coleman, made a short address, in which he stated that though he may not have quite as much "pep" as in former years, yet he was very glad to attend meetings of this nature and the work of the board would receive his hearty and vigorous support, for there were many ways in which the Board could promote the town's interests.

The president reported that Calgary Board of Trade would make a good-will visit to the Pass towns, and cars would be asked for to convey them from Coleman to Pincher Creek.

The visitors were Mr. McAllister of Blairmore and Mr. Lucy of Calgary.

The meeting closed with the singing of the national anthem.

## Collecting for Bible Society

Mr. A. A. Lytle, representing the British and Foreign Bible Society, spoke at the United church here on Sunday morning, and in the evening at Hillcrest mission. On Monday he made a canvass of several business places, and secured a number of donations. He stated through lack of organization here Coleman had not given as much as in some other years, when the record showed over \$100 was given. The sum needed each year is \$2,250,000, and Southern Alberta's objective is \$100,000.

Mrs. Sofia Landick, aged 62 years, died on May 19, the funeral being held on Tuesday. She was a native of Czechoslovakia.

## Local News

A social evening was spent at the home of Mrs. E. Hill for the Pythian Sisters, to bid farewell to Mr. and Mrs. Denholm, who are both members, and are moving to Creston, B. C. Mrs. Denholm was presented with a suit case.

James Collins, father of Mrs. C. J. Devine, died on Saturday at Parkside, Sask., at the age of 72 years. He had been farming there for a number of years, coming to the west from Collingwood, Ont., in 1921. The funeral was held on Tuesday, at Parkside.

On Friday, May 17, the Pythian Sisters met at the home of Mrs. Glendinning for the purpose of saying farewell to one of their Sister Officers, Mrs. J. Muir, who is leaving for the Coast. Whist was played, Mrs. Derbyshire being the winner of the first prize, and Mrs. Denholm the boobie. A very enjoyable evening was spent and a good lunch served, after which Mrs. Muir was presented with an emblematic ring of the Pythian Sisters order and all wished her happiness and success.

## C.P.R. Branch Lines

Heavy Programme Of Extension For the Season Of 1929

Under its policy of development and expansion, the Canadian Pacific Railway has already this season let contracts for 286 miles of branch lines construction in Western Canada, according to D. C. Coleman, vice-president, western lines. This figure was reached following the announcement of four additional contracts totalling 112 miles, and it is expected that when the contracts for the newly authorized Langtan-Prince Albert branch are let, that the construction programme for the season of 1929 will call for slightly more than 400 miles. Work on these contracts will be commenced immediately.

Contracts announced follow: Nipawin, toward Prince Albert, 25 miles; contractor F. Mannix, of Calgary.

Kootenay-Landing to Proctor, 35 miles; contractor Dutton and Grant, of Winnipeg.

Archive to Wymark branch from Lake Johnson to Wymark, 27 miles; contractors, Riley, Reid and Sandgren, of Edmonton.

Suffield to Blackie branch from Arrowwood to Blackie, 25 miles; contractor Tomlinson Construction Co., Ltd., of Winnipeg.

Contracts already given this spring and which call for 174 miles of construction follow:

Acme, northeasterly, 25 miles; contractor, F. Mannix, of Calgary.

Willingdon to Vegreville, 25 miles; Brooks Construction Co., Prince Albert.

Lake Alna, west, 18 miles; contractors, Riley, Reid and Sandgren, Edmonton.

Lloydminster, northeasterly, 25 miles; contractors, Rosa and Wickstrand.

Unwin, westerly, 20 miles; contractors, Rosa and Wickstrand.

Coronation, Youngstown, 41 miles; contractor, F. Mannix, of Calgary.

This company will also proceed with the Lacombe northeasterly, a distance of 20 miles. Stewart & Cameron, of Winnipeg, are the contractors.

In making the announcement Mr. Coleman stated that Royal Assent had recently been received for the legislation authorizing the construction of the branch line from Langtan to Prince Albert, and that it was proposed to let contracts for this work at the earliest possible moment, and immediately following the acceptance of the plans by the Board of Railway Commissioners, at Ottawa.

This line will be 117 miles in length and will form an important link in the western branch line system. The programme, Mr. Coleman stated, indicated that the Canadian Pacific Railway was proceeding actively with its projected branch lines and, further, that it was going ahead with its plans for the opening of the northern country. This was particularly emphasized by the letting of its contract to build from Nipawin toward Prince Albert, and by the fact that during the winter the company devoted a great deal of energy to the construction of a combined highway and railroad bridge over the Saskatchewan at Nipawin.

The piers for his bridge are now in place, he stated, and the structure will be completed as soon as possible. The company keen interest in northern development was further indicated by the announcement that the Langtan-Prince Albert branch would be proceeded with this season. Another important line was that scheduled from Kootenay Landing to Proctor, in British Columbia. This line when completed will give an all rail southern route to the Pacific Coast. The line, a connecting link, was made necessary by the growth of traffic and will do away with the necessity of using boats on Kootenay Lake. The construction work itself will be one of the most difficult since early construction days in Western Canada as the line will be built through mountainous country. It will be necessary to put in two tunnels, one 400 feet and the other 1,000 feet, and one bridge over the Kootenay Lake at Kootenay Landing which with approaches will be 3,500 feet in length.

The branch lines on the prairies will, he stated, prove of immense value to the agricultural communities and will greatly facilitate the movement of grain to markets and manufactured commodities of the farmers and distributing centres.

Negotiations with the Canadian National Railways are proceeding effecting the entrance of the Canadian Pacific Railway to Battleford and North Battleford, and negotiations for an exit for the Canadian Pacific Railway from Prince Albert north-westerly will shortly be undertaken.

Ship Muskies To England

What is stated to be a record consignment of muskrats in one batch to the Old Country was shipped on April 16th from Lindsay to Southampton, England, in the care of the Canadian Pacific Express Company. The rodents are to form the nucleus of another muskrat farm in England, where the industry is thriving under an increasing demand for furs.

Altitude Of Banff

Banff, the headquarters of Banff national park, Alberta, has an altitude of 4,538 feet above sea level and enjoys a climate which is in many respects, ideal. The air is exceedingly pure and has a most exhilarating effect.

Traffic Cop: Don't you know you can't turn around in the middle of the block?

Fur Lady: Oh, officer, I think I can make it. Just watch.

W. N. U. 1786

## ECZEMA CAUSED MUCH PAIN

On Fingers. Lasted Ten Years. Cuticura Healed.

"When I was two years old eczema broke out in a rash between my fingers and caused much pain. My fingers were swollen and inflamed. The itching and burning caused me to scratch, which made it worse. I lost sleep on account of it."

"The trouble lasted about ten years before we began using Cuticura Soap and Ointment. After one week's use it looked better, and after using three boxes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Ellen Cavanaugh, Enterprise, Ont., June 3, 1928.

Rely on Cuticura Soap and Ointment to keep your skin clear.

## WORLD HAPPENINGS BRIEFLY TOLD

Plans for increasing the capacity of the Alberta Wheat Pool elevator No. 1, at Vancouver, by 2,750,000 bushels, giving the plant a storage of 4,750,000 bushels have been completed.

President Paul Von Hindenburg, Germany's soldier-statesman, will retire from public life at the expiration of his present term of office in 1932, and spend the remainder of his days on his country estate in Hanover.

Mrs. Ernst Vierkotter, wife of the well-known marathon swimmer, will enter the 10-mile event of the Wrigley marathon at the Canadian National Exhibition if she is able to get into condition. She was formerly Germany's woman long distance champion swimmer.

Refusal of the U.S. supreme court to review its recent decision on the commuting of British subjects and naturalized citizens of Canada means that only native born residents of Canada will be permitted to commute to that country for employment.

The H.M.C.S. Patriot, a destroyer presented to Canada by Great Britain following the war, has been sold to a British ship breaking company and it is understood will be towed to England shortly for scrapping. Her propellers have been removed at a Halifax dry dock.

A request will be made to the Canadian government by the United States for information concerning the seizure of five United States fishing vessels in Canada's Goose Island harbor, British Columbia, for alleged violation of the fishing treaty between the two countries.

The Department of National Defence know nothing whatever of any new explosive having been invented at Petawawa artillery camp, nor is the department conducting any experiments in connection with such explosives, was the official declaration issued from the department at Ottawa.

## Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work. I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—Evelyn Bouque, 132 Alma Street, Moncton, New Brunswick.

Lydia E. Pinkham's Vegetable Compound

## Recipes For This Week

(By Betty Barclay)

## THREE-IN-ONE RECIPE

## Lemon Gelatine

1 tablespoon granulated gelatine.  
2 tablespoons cold water.  
1/4 cup boiling water.  
1 cup sugar.  
Few grains salt.  
1 cup lemon juice.  
Soak gelatine in cold water 5 minutes; add boiling water, sugar, salt and lemon juice. Turn into cold molds and chill.

## Lemon Sponge

For Lemon Sponge, when jelly begins to stiffen, beat with egg-beater until light and frothy.

## Lemon Snow

For Lemon Snow, add to lemon sponge the stiffly-beaten whites of 2 eggs.

## CORN SOUP

1 medium can corn.  
1 cup boiling water.  
1 slice onion.  
1 teaspoon salt.  
Few grains pepper.  
2 cups milk.  
2 tablespoons flour.  
2 tablespoons butter.

Rinse can with boiling water and add to corn and onion. Simmer 20 minutes. Rub through a sieve. Add mixture to 2 cups thin cream sauce (2 cups milk, 2 tablespoons flour, 2 tablespoons butter). Season and serve hot.

## Naming Our Highways

Continued progress has been made in the naming and numbering of motor roads in Canada and in the erection of uniform direction and warning signs and danger signals. Inter-provincial conferences have been held for the purpose of standardizing signs, signals, and other highway devices throughout the Dominion.

## Old Clock Still Going

Among the possessions of Mrs. Emily J. Conaghan, Columbus, Ohio, is an old wall clock which she says has ticked every hour of her life. She said the clock is 86 years old, four years her senior, and has never failed to keep correct time.

## Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Pugsley, East South-ington, N.S., writes:—"I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night. I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness caused by their heart and nerves.

Price 50c. per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## SUNDAY SCHOOL LESSON

MAY 28

## GOD'S LAW IN THE HEART

Golden Text: "Thy word have I laid up in my heart, that I might not sin against Thee."—Psalm 119:11.

Lesson: Jeremiah 31:1-40; John 1:17; Hebrews 8:7-13.

Devotional Reading: Psalm 119:9-16.

## Explanations and Comments

Individual Responsibility For Sin. Jeremiah 31:29.—There was an old saying among the Jews that the fathers have eaten sour grapes, and the children's teeth are on edge. The proverb puts the responsibility for the sins of one generation upon the preceding generation. In Jeremiah's day the people were complaining that they were being punished, not for their own sins but for the sins of an earlier generation. In the future, Jeremiah declared, individual responsibility would be recognized, a man would realize that he was judged for his own sins, not for those of others, and this proverb would no longer be repeated. The fathers had sinned, but the children had sinned, too, and the children would be held responsible for their own sins. To express this, Jeremiah amended the proverb to read, "Every man that eateth his sour grapes his teeth shall be set on edge."

Most people like to lay the blame for their misfortune or faults upon anyone or anything rather than upon themselves. It is the fault of circumstances, that they are not more successful in life, it is their unfortunate heredity that has made their character what it is. Some one else is to blame for his "long-drawn-out" of humanity. Jeremiah placed the blame where it usually belongs. In our soul God is constantly speaking to us.—He warns us against evil. He exhorts and encourages us. He says, "Suppose thy boy has done another bad turn. The one who has been wronged has been brooding over his wrongs, when suddenly he learns something about his companion, the knowledge of which by others will do him immense harm. He will have his revenge, he thinks; but while he is comforting himself in this way, a voice is heard, soft but most persistent, saying to him, 'It is a mean thing that which you have in mind to do, it is a cruel thing; don't retaliate by the same token. Leave him to his thoughts, keep your own unstained.' That is the voice of God.

Perhaps you are out somewhere alone, saying to him, 'It is a mean thing that which you have in mind to do, it is a cruel thing; don't retaliate by the same token. Leave him to his thoughts, keep your own unstained.' That is the voice of God.

Perhaps you are out somewhere alone, saying to him, 'It is a mean thing that which you have in mind to do, it is a cruel thing; don't retaliate by the same token. Leave him to his thoughts, keep your own unstained.' That is the voice of God.

Perhaps you are out somewhere alone, saying to him, 'It is a mean thing that which you have in mind to do, it is a cruel thing; don't retaliate by the same token. Leave him to his thoughts, keep your own unstained.' That is the voice of God.

## "Just a Slice Of Ham" But With New Flavor

"They all said they weren't hungry—but look at the platter!" That's how it goes when you cook your slice of ham in Borden's St. Charles Milk, according to the recipe below. The mustard flavor is cooked in, and there's a suggestion of cloves, too—besides the extra-rich milk which gives every dish a superb savor and nutritive value. Be sure to use St. Charles milk—ordinary milk is too thin.

## Baked Ham With St. Charles

1 slice ham cut about 1 inch thick, with rim of fat.  
1 tablespoon sugar.  
1 cup Borden's St. Charles Milk.  
1 teaspoon mustard.  
1 tablespoon flour.  
1/2 teaspoon ground cloves.  
1/2 cup water.  
Trim off rim of fat and cut in very small pieces. Thoroughly mix flour and mustard and put into ham. Place in rather deep pan. Mix together cloves and sugar and rub through the fat; place over top of ham. Dilute milk with water and pour over ham to cover. Bake in a moderate oven until ham is tender, about one hour. Add more milk as needed to cover ham while baking.

## Good Lamb Chop

Southern Alberta stock owners are harvesting one of the best lamb crops in years, it was revealed at the annual meeting of the Southern Alberta Sheep Breeders' Association at Lethbridge, Alta., recently.

A leading authority on steel has stated that the world loses \$2,500,000,000 yearly due to the corrosion of steel.

Many a man learns to shift for himself when he buys his first car.

LADES WANTED TO DO PLAIN and light sewing at home, whole or spare time; good pay; work sent any distance; charges paid. Send stamp for particulars. NATIONAL MANUFACTURING CO., Montreal.

## Many Conveniences In

## British Post Office

## People Accommodated In Many Ways For Small Charge

The British post office officials are capable and obliging and if anyone should lose himself, he can go to the nearest post office and mail himself home. An express messenger is sometimes given charge of a person and takes him to his destination, where he obtains a receipt. The charges, based upon the distance travelled, are quite moderate. If you merely wish to prove that a letter has been posted, there is no need to register it. The Post Office will supply you with a "certificate of posting" for a halfpenny. If you miss the last collection of letters and have an urgent communication to send, ring up the head post-office of the district, tell them your plight, and dictate the letter. It will be written out and sent off with the night mail. The charge is threepence for the first thirty words, a penny for every ten afterwards, and the ordinary postage and telephone fee.

## Five Thousand New Farms

## Increase In Alberta Six Per Cent. Of Entire Cultivated Area

Hon. George Hoadley estimates that 550,000 acres of land which was newly broken last season will be under crop this year in Alberta. That is equivalent to more than 5,000 farms of a quarter section each, all entirely under crop. Or to twice that number with half of each under crop. The increase is approximately six per cent. of the entire cultivated area in the province. In sixteen years at that rate of going the crop area would be doubled. And the outlook is that there will be more land broken this year than last. The old drivers and mining companies are not the only parties who are making a lively drive on the latent resources of the west. The chap who is turning up the sod is also doing a turn that is worth making note of.

## Disinfection is the better part of

## dissuade.

Every sower must one day reap from the seeds that he has sown.

## It May Be Urgent

## When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctor's word for that! It is a vegetable product and you could use it every day. But it's in an emergency when Castoria means more. Some night when constipation must be relieved—or colic pains—or other suffering—keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

## THE CRIMSON WEST

—BY—  
ALEX. PHILIP  
Published by Special Arrangement  
With Thomas Allen, Publisher,  
Toronto, Ont.

As dusk fell over lake and mountain, Donald returned from Wainwright's cabin. Andy glanced up expectantly as his friend appeared, but quickly averted his face as he saw Donald's features. Donald sank disconsolately to a seat outside the kitchen door. He had found Wainwright alone and wondered if Connie had purposely absented herself. Her treatment of him since her return puzzled him sorely and had filled him with a great depression. As he rose and walked toward his cabin, Andy gazed after the retreating figure, eyes filled with compassion, then turned to speak to one of his helpers in such an irritable tone that the stunkey's mouth opened in astonishment.

For three evenings it was the same. Donald failed to find Connie at home; nor did she come to the mill. He regretfully decided that it was no coincidence, but that she was deliberately avoiding him.

On a Sunday afternoon Andy saw Donald gaze yearningly toward the bluff, then turn up the trail leading to the dam.

At Donald's request Gillis had diverted logging operations to circle the little oasis in the heavy timber, so that Connie's sylvan glade still held its primeval charm and beauty.

Donald stood for a moment gazing reflectively into the white foam at the foot of the tiny cataract, then threw himself on the soft bed of moss and closed his eyes. But this time the fairy spot did not bring the usual delicious languor to his harassed spirit. Birds sang as sweetly; flowers filled the air with the same odour; the wind sighed as softly through the tree-tops; and the small brook still sang its rippling song. The rapid tattoo of a woodpecker's bill on a hollow tree jarred his nerves and he tossed restlessly.

A cedar pit floated through the air. Blown by the wind, it fluttered in circles, then gently on the hands bying on his chest. His eyes opened, then, with trembling limbs, he came to his feet.

Connie, clad in faded overalls and cotton shirt, stood on the edge of the "meat." Her breast was heaving, her loomed golden hair flying in the wind. The softness in her blue eyes made Donald gasp, and his heart thumped as though it were in his throat.

"Connie!" he cried huskily, "I love you, dear! Don't you care for me a little?"

She sprang lightly to the ground and came toward him, her arms outstretched. Tears of joy coursed down her cheeks. "Oh, Donald, Donald, you big stupid!" she sobbed, "I have been waiting here for you every day. I—I have loved you always."

With a shock of incredible rapture Donald gathered her in his strong arms, where she cuddled like a weeping child. He kissed her red lips, her eyes, hair and throbbing throat. "My little Connie," he said, in a voice vibrant with feeling, "do you really love me?" He pressed his cheek to

hers and felt the flutter of her long lashes as she pressed the softness of her own closer. The quick, exquisite drawing of her sobbing breath were lovely answering things, and he thrilled to hear her whisper: "Yes, Donald! Yes, Donald!"

Andy came walking meditatively up the path, his hands clasped behind him, his blood head bowed in deep thought. Not finding Donald at the dam, he walked up the hill to enter the meadow—just as Donald clasped Connie in his arms. For an instant the little Australian stood rigid, his eyes bulging, then retreated hastily to the shelter of the trees. Any one seeing Andy at that moment would have thought him suddenly gone mad. He whirled about in a wild dance, hugging himself in an ecstasy of joy. Ceasing his mad gyrations, he dashed his hand across his eyes and bolted like a runaway down the hill.

Gillis and his "redshirts" sat sunning themselves on the steps of the dining-room. They sprang to their feet, laughing and shouting, when they saw Andy tottering down the hill. Breathlessly Andy told them of the scene he had witnessed. "We'll give them a blinikin' good reception when they come down," he panted. He issued several sharp orders and the men scurried happily to execute his commands.

The train that was to carry the excursionists to the Coast was being made up on the siding. While they were awaiting this, the visitors watched with curious interest the mysterious preparations being made by the loggers.

At this moment, hand in hand, Donald and Connie turned the corner of the building. As they did so they came to a sudden halt and stared at the odd scene before them. The men stood in two orderly rows. The ground between was carpeted with wildflowers, and each logger held a mass of blooms in his hand. At the far end of this lane of men stood Andy, a wide smile on his droil face. Connie lowered her eyes in confusion. Donald shook his fist at Andy. "You little beggar! You are responsible for this!"

Andy chuckled. "Come on, Connie, be a sport," he coaxed.

With flushed faces Donald and Connie walked down the aisle, while the men pelted them with flowers. The crowd of visitors clapped their hands in appreciation of this beautiful scene. As they neared the end of the gauntlet, Andy sprang to a stump.

"Three cheers for the 'appy couple!'" he yelled. A roar of cheering followed. "A tiger!" shouted Andy. And again the air trembled to the hoarse shout of brawny throats.

Donald led Connie straight to his mother. "Mother," he said bashfully, "meet your future daughter."

Quick tears came to his mother's eyes as Donald made this announcement. "My dear," she said tenderly, as her arms folded about Connie, "you are all love and tenderness."

The train's whistle screamed its warning and the crowd moved down to the station.

"Will you be coming home to us soon, Connie?" asked his father as he was leaving. Donald looked down at Connie.

"We'll visit you on our honeymoon, Dad," responded Donald happily. He swept his arm toward the mountains. "I could never leave this. The spell

of the Great West has entered my blood."

Janet had spent the afternoon paddling idly on the lake. When she received the news of Donald's engagement she concealed the ache in her heart by an outward air of indifference. The presence of a headache enabled her to keep in her cabin and she did not appear for dinner. She wanted to be alone with her thoughts.

When the shadows lengthened, Donald and Connie moved slowly along the path toward the bluff. As they turned a curve in the trail Janet came to the window of her cabin and stood watching them until they disappeared from sight.

Andy, sitting a few feet distant with his back against a tree, noted the look of dependency on Janet's face. He came to his feet and walked slowly toward the kitchen. "As Methusalem said through 'is whiskers,' 'is who 'olds 'is 'ead too 'igh will 'it 'is blinkin' toe.'"

As the lovers were about to turn up the mountain trail, the trapper emerged from the woods with his old pack-horse. The cayuse was piled high with luggage.

"Where are you going, John?" queried Donald.

"I'm hittin' the trail, ol' timer." "I hope you are not leaving us," said Connie.

"Yes, I'm quittin' the country."

"Why?" questioned Donald.

"Gettin' too thickly settled. I feel that I ain't got room to breathe. I'm goin' way back into the Cariboo somewhere so's I kin be by myself."

The rage of medieval hermits is not dead. The spirit still led the trapper into the forest guides others there today. There are men whose souls long for a place untamed, who yearn to breathe the wild free air. They want a home straight from the hands of the Creator, unspoiled by man. They may be trappers, they may be brave cold and hardships to clothe in brave in warm fur; they may be prospectors, who search out the hidden gold for others to use. Whatever they may be, these hardy men blaze the trail for others to follow.

When Donald told the trapper of the coming wedding the old man's eyes softened. "I'm glad. It's just right. I hoped you two would get married." He shook hands gravely then chuckled to his horse.

"Good-by, Connie! Good-by, ol' timer! God bless ye!" he shouted over his shoulder.

Donald and Connie stood watching the patient old figure as he trudged behind his cayuse. At a turn of the trail he stopped and for a long interval gazed back at the log cabin by the stream, which had been his home for so many years. He waved his hand in farewell, then horse and man disappeared from view.

When Donald and Connie reached the bluff the sun had sunk in the crimson west, leaving a rich afterglow that spread across the horizon from west to east, the rich colours merging by slow degrees into that pure pearl-grey which makes the long and lovely twilight of the British Columbia mountains. Down on the lake mists were gathering, but in the upper sky and on the glaciers a vivid orange glow still lingered. The trees stood stiff and motionless in the quiet air.

From afar, subdued but clear, came the hoost of a blue grouse, and from mountain gorges came the faint sighing sound of distant waterfalls. Sweet and pungent odours of wild flowers came from the woods about them. A star of silver brilliancy sparkled suddenly out in the sky over the massive snow-clad peaks.

"Venus," whispered Connie. Donald's gaze swept from the camp, nestled at their feet, to the darkening heavens to the star of love, then down to the girl by his side.

There are moments in the lives of all men—regardless of creed or religion—when they feel the nearness of God. Such a moment came to Donald. His uttered no sound, yet his soul was crying out in their thankfulness.

Connie sensed his feeling. She bowed her head, her eyes misty with joy and gratitude. "Oh, God," she murmured softly, "we thank Thee for Thy many blessings."

### THE END.

#### Took It Literally

An income tax clerk recently received from a "client" a form which was incomplete. Thereupon he sent it back with large crosses in red ink, where it was necessary to be filled in, with the words, "Please complete where marked in red ink." Some days later the following reply was received: "Dear Sir—I have no red ink.—Your faithfully."

Sunday is being turned into doomsday.

Minard's Liniment—good for tired feet.

### Variations Of Steel Tape

A 300-foot flat band steel tape will vary in length in the range of temperatures met, with in Canada, by several inches according to investigations of the Physical Testing Laboratory of the Topographical Survey, Department of the Interior.

## BABY'S OWN TABLETS WIN GREAT PRAISE

### Many Mothers Always Keep Them In The House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets, Mrs. Donat Plouffe, Pingwick, Quebec, writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The St. Mary's Journal-Argus says there are 55,000 chances of making a typographical error in printing a page of news. Needless to say, there are no errorless pages.

### Active In Rust Research

#### Winnipeg Doctor Resolves Appointment In Winnipeg Laboratory

Dr. Lillian Hollingshead has been appointed to the plant-breeding staff at the Dominion rust research laboratory, Winnipeg. She is a Canadian, her home being in Saskatchewan. She graduated with honors in arts and took post-graduate work in botanical sciences at the University of Saskatchewan, at Saskatoon, where she worked with Dr. W. P. Thompson on the cytology of wheat hybrids.

Miss Hollingshead has been working three years in California, with Drs. Goode, Clausen and Babcock, specializing in cytology, and has made some quite interesting discoveries in the cytology of tobacco hybrids, which findings were presented at the recent meeting of the American Association for the Advancement of Science at New York. At the rust research laboratory at Winnipeg she will co-operate with the plant-breeding specialist in attempting to produce rust resistant varieties of wheat.

### Little Helps For This Week

"The example, and shadow of heavenly things."—Hebrews viii, 5.

From the eternal shadow, rounding All our sun and starlight here, Voices a four lost ones sounding, Bid us be of heart and cheer— Through the silence, down the spaces, Falling on the inward ear.

Know we not our dead are looking Downward with a sad surprise. All our strife of words rebuilding, With their mild and loving eyes? Shall we grieve the holy angels? Shall we cloud their blessed skies?

—John Greenleaf Whittier.

If ever I am tempted to do something which is easy and pleasant, instead of something hard and disagreeable, which nevertheless I ought to do, if I can only think of those lost saints of mine, who always expected me to do right, and always showed the way, at once my will is fortified. No matter if we have our living friends, who are a law unto our lives, a succor to our wills, the cloud of witnesses cannot be too full of eager and expectant souls. The influence of our beloved dead comes to us purified of all earthly dross and stain,—there is a flawless, moral inspiration.—John W. Chadwick.

First Cook—"What do you do with yourself now that the ice man is out of a job?"

Second Ditto—"Well, the man who collects instalments on the electric refrigerator ain't such a bad sort."

DOCTORS quite approve the quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them marvelous at such times. The proven directions found in every package of Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.

## ASPIRIN

Aspirin is a Trademark Registered in Canada

### Canadian Honored

Medical Council Of London Nominates Ontario Man For Presidency

Donald Armour, M.D., C.M.G., F.R.C.S., a native of Cobourg, Ont., has been signally honored by receiving the unanimous nomination of the Council of the Medical Society of London, for the presidency of the body.

Dr. Armour is a son of the late Hon. J. D. Armour, a chief justice of Ontario. His election will mark the first occasion upon which a graduate of an overseas university has held the office of president of the historic British society.

### Stiffness

After strenuous activity, a rub down with Minard's Liniment will prevent aches and pains.

## Riding abreast of the times

You expect more from your motor car today than you did ten years ago. And you get it. Greater speed, smoother power and more responsive performance are common to modern cars as a result of the development of higher speed, higher compression motors.

These improved engines demand a better oil—fuller-bodied, with greater resistance to heat and wear.

To ensure a better motor oil, Imperial Oil Limited goes all the way to Peru for the crude from which to make Marvelube. Marvelube is made from a base that is rich in all the qualities necessary for better lubrication of the modern motor. It is today the oil standard for high-speed motors from coast to coast.

Marvelube is preferred by over half a million motorists in Canada and is the choice of aircraft operators because of its superior lubricating qualities.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. Consult the Marvelube Chart at Imperial Oil stations and dealers.

**Marvelube**

## Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour. Atrial kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Get prove this for your own sake. It may save a great many disagreeable hours and give you the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full directions—any druggists.

## Personal and Local

H. C. McBurney was a Calgary business visitor over the week-end.

Miss May Moores, who is training as a nurse in Calgary, is spending a holiday with her parents here.

Coleman will be "host" to a large number of school pupils from all towns in the Pass tomorrow. Join in and make their visit as pleasant as possible.

Mr. and Mrs. A. M. Morrison, and Mr. Mustard and Mr. Brink, the latter gentlemen of General Motors Ltd., Winnipeg, motored to Cranbrook on Sunday.

The man who counts as being worth while, is he who takes action. Too many talk about what ought to be done, but are darned slow in jumping in and helping to put it over.

A number of young ladies from Hillcrest were entertained by the young ladies of the Catholic church here on Monday evening at the Catholic hall, a very enjoyable evening terminating at midnight.

Route maps were received this week by the Board of Trade, Coleman Garage and Grand Union Hotel from the Western Canada Road Route Service, Calgary, together with signs and strip map holders.

A party of Summit Lodge, A.F. & A.M. members, including W. L. Rippon, J. Wood, G. Pattinson, W. S. Purvis and M. W. Cooke, made the annual visit to Macleod lodge last week.

T. Marland was injured in the McGillivray mine just as he was coming off shift on Monday afternoon, his foot being jammed when he was struck by a "dinky" engine. He is at present in hospital, making good progress.

Tomorrow, Victoria Day, will be observed as a general holiday throughout Canada. It will be celebrated in Coleman by the holding of the annual field day of sports by the schools of adjacent towns in the Crows Nest Pass.

Dignify your business by the use of printed letter heads, statements and envelopes. It creates a favorable impression. We have seen statements sent out by local houses that were to judge the business by the appearance of its stationery, would be at around zero mark.

Two lady hikers, Hildred Beaton and Barbara Throng, stayed in town at the Grand Union over night on Sunday, and are making a walking tour from Toronto to Vancouver. Both were merry and bright and appeared to be enjoying their experiences of the open road.

## CLASSIFIED ADVERTISEMENTS

FOR SALE OR RENT—Modern house on 1st Street, Coleman. Rent \$25.00 per month. Apply to R. F. Barnes, Barrister, etc., Coleman. 38-3.

FOR SALE—Kitchen Cupboard, also big chair. Apply to P. Sharp, 3rd street.

FOR SALE—Fully modern house with bath room, ideally located; a splendid home. Enquire of Mr. J. S. Rogers, Sixth St.

NOTICE—Have you something to sell? Advertise it in this column. 2c a word, minimum charge 35c.

### POST OFFICE HOURS

On May 24 the general delivery wicket will be open from 9.30 to 10.30 a.m., and the same hours on June 3, the King's birthday.

Patronize the advertisers in The Journal. You are assured of good values and high quality goods from the enterprising merchants who persistently advertise their goods and prices.

"Sully" Sullivan, editor of the Cranbrook Courier, apparently is enjoying the simple life in the big hills, where as one fellow says, "men are men." Whatever he is doing out there is a mystery, and we're just curious enough to want to know, especially after reading in last week's Courier that he was seen heading out with a suspicious looking keg in his flivver.

J. A. DeWolfe, fuel agent of the C.P.R., Calgary, arrived bright and early on Monday morning, before most of the men he wanted to see were around, and spent the time having a look at the coal loaded on the cars. Later he visited the mines at Bellevue and Blairmore. He recently returned from a trip to London and Chicago.

John Watson, of Fan 98, International Mine, south of town, made his first visit to town since September on Friday last. The road through to York creek has been made more accessible to cars, and the company now operates a truck to convey men to the distant workings at York creek, saving time in walking.

Take a lesson from the mail order houses in going after new business, by imitating some of their methods in advertising. It produces results for them; therefore try the same stuff on the people you are striving to sell to. It is the best antidote and will prove to people that you are making a really serious effort to secure their business.

### ST. ALBAN'S CHURCH, COLEMAN

Services for Trinity Sunday, May 26—Holy Communion 8 a.m., evensong 7 p.m.

This evening (Thursday) at Cole's theatre, Bellevue, "The Wishing Cap" will be given by the W.A.
